

MARE FEES

Puget Sound Equine Reproduction Center

BOARDING FEES - per day:

Mare	\$ 25.00
Mare & foal	\$ 30.00

Board fees are payable to Pilchuck Veterinary Hospital. To minimize boarding costs, it would be best for the mare owner to have their mare ready to be bred soon after she arrives.

BREEDING THROUGH ONE HEAT CYCLE

This includes all follicle palpations/rectal exams, speculum exams, artificial inseminations (shipped, cooled semen), and ultrasound examinations. It also includes the cost of HCG for close prediction of ovulation. This fee will not include any uterine diagnostics (culture and/or biopsy), treatment (oxytocin, flushing, antibiotic infusion), or sedation if needed. If these procedures need to be performed, it will be at an additional cost. Pregnancy examinations are not included in this package. Ultrasound pregnancy examinations are recommended at 15, 30, and 45-60 days. Clients are welcome to leave their mare at the Center for pregnancy examination if they wish.

TOTAL \$468.00

FROZEN SEMEN

The same services are provided as above. This includes HCG or Deslorelin as an ovulatory drug. It would be highly recommended that at least two insemination doses be made available per breeding cycle.

TOTAL \$625.00

LIVE COVER

If you plan on live cover, please contact us for associated mare/stallion handling fees.

STALLION COLLECTION AND PROCESSING

A fee of \$200.00 will be charged to the responsible party for the AV collection and semen processing. Some stallion owners may elect to accept this cost themselves, or they may pass it on to the mare owner. If the stallion is to be bred to more than one mare from the collection, the fees will be split among the mare owners.

TOTAL \$200.00

If our Equitainer is used to hold the semen there will be an Equitainer rental fee of \$26.00. If the Equitainer is shipped and is not returned within four days (via FedEx second day), a late fee may apply.

In addition to the above veterinary services, FedEx, courier and/or air transport may/will be involved. FedEx next day delivery fees vary with the destination (~\$40.00 and up). A fee will be incurred if a courier is needed to pick up/deliver semen at FedEx or the airport (~\$30.00-\$105.00). The fee is dependent on location and time of day.
